Solutions

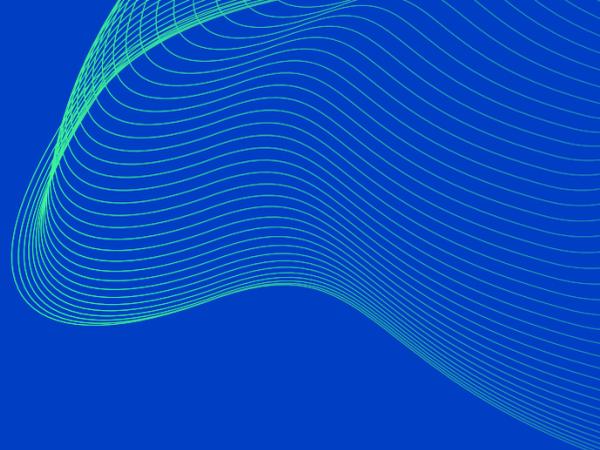

WHO WE ARE?

Switch Communications delivers reliable, end-to-end networking, security, and IT solutions to businesses across Pakistan, enabling organizations to operate with greater efficiency and stability.

With a proven track record of managing nationwide projects, including 9+ years of Jazz LAN/Passive operations, surveillance deployments for Jazz B2B, extensive DC/passive work for major enterprise groups, and maintenance of 150+ servers for telecom operators, we bring deep technical expertise to every project. Our dedicated in-house team consistently delivers large-scale installations, surveillance systems, and passive infrastructure projects with dependable execution, timely support, and long-term service continuity.

OUR MISSION

At Switch Communications, we provide reliable enterprise solutions in networking, security, IT services, and system integration. We help businesses stay connected, secure, and efficient with modern, practical technologies. Our nationwide technical team of 100+ resources ensures smooth operations and dependable support.

TECHNOLOGY

IT & ENTERPRISE SERVICES

Switch Communications is one of Pakistan's leading Telecom & Enterprise solution providers, as it enables organizations to explore new business avenues by creating premium products and services.

NETWORKING

We deliver structured cabling, data center design and implementation, high-speed fiber installation, and preventive maintenance to ensure reliable, efficient, and uninterrupted network operations.

SECURITY & SURVEILLANCE

We deliver smart CCTV surveillance, AI-driven automation, biometric and PABX systems for secure communication, and home automation solutions for intelligent control of security and daily functions.

IT/SERVICE PROVIDER SOLUTIONS

We offer IT resource augmentation, network profiling and security, geo-fencing and GMLC services, VAS virtualization, secure charging gateways, IMS VAS platforms, and scalable OTT and video streaming solutions.

INTEGRATION SERVICES

We provide B2B support and managed services, IP/MPLS/MPBN network design, SD-WAN solutions, BSS/OSS consulting, cloud and virtualization services, ongoing operations and maintenance, and router and switch installation and configuration.

FIRE ALARM SYSTEM

Our fire alarm system is designed to detect and alert you of potential fires, giving you peace of mind and potentially saving lives.

- Fire detectors
- Alarms
- Notification appliances
- Wiring and cabling
- Backup power supply

BIOMETRIC SECURITY

Our biometric security technology uses unique physical characteristics (face, fingerprints) to authenticate individuals, ensuring only authorized access to your property.

- **Accuracy:** High level of accuracy in recognizing and verifying an individual's identity.
- **Accessibility:** Suitable for individuals with disabilities or impairments who may struggle with traditional authentication methods.
- **Integration:** Can be integrated with other security systems such as access control systems, surveillance cameras, and alarms.

HOME AUTOMATION (ALEXA)

With home automation powered by Alexa, you can control your home's lighting, temperature, and more with just your voice.

- Smart home integration
- Voice control
- Personal assistant
- Routine management
- Skill integration
- Multi-room audio

CLOUD SERVICES

With centralized access, real-time monitoring, and reduced infrastructure costs, cloud services ensure reliability, flexibility, and uninterrupted business continuity.

- CCTV cloud services
- Managed Cloud IT Support
- Cloud Backup & Disaster Recovery
- Cloud Attendance & Access Control
- Cloud POS System
- Helpdesk / Ticketing System

WHY CHOOSE US?

In-house expertise

We have an agile, forward-leaning in-house team of 25+ experts, supported by a nationwide technical workforce of 100+ professionals across all major cities of Pakistan. Our teams are available 24/7/365 at core sites to ensure seamless, reliable operations.

New network point installation
